What Are The Training Courses Called Level I, II, III And How Does Our INFRARED CERTIFIED Training Compare? Over 20 years ago several levels of infrared courses were set up for training individuals in various fields of thermography. None of those were developed expressly for the building inspector and contractor. InterNACHI has now filled that gap with this very intense two day thermal imaging training course, that concentrates totally on the needs of the inspection industry and methods necessary to utilize an infrared camera, with knowledge and confidence. Our certification trademark is federally registered and issued by the largest home inspection association in North America.

Training Comes To Your Home Live Interaction With Students And Teacher - Same Class Materials On Everyones Computer - Question And Answers - Step By Step All The Way! ## Canada. Infrared Training Course

TITLE: "Thermal Imaging And Building Science" This is an infrared training course intended to familiarize home inspectors with this new non-destructive testing technology and its applications for building and home inspections.

1. What is thermal imaging?
2. The purpose of Thermal Imaging in Home Inspections.
  1. Better Inspections
  2. Decreased Liability
  3. Additional Income form Ancillary Services
3. The Physics of Light
  1. Electromagnetic Spectrum
  2. Frequency
  3. Color
  4. Heat
4. The Physics of Thermal Imaging
  1. Delta T
  2. Emissivity, Reflectivity, Transparency
  3. Thermal Mass
5. Different Types of Image Display
  1. Black & White, Rainbow, Iron
  2. Temperature Scales.
  3. Adjusting temperature scales for a better image.
6. Applications for Home Inspection
  1. Water Infiltration
  2. Excessive Moisture in Materials
  3. Electrical Inspection Applications
  4. HVAC applications
  5. Pipe Location
  6. Pest Infestation
  7. Energy Audit
7. Inspection Techniques
  1. Exterior scanning.
  2. Interior scanning.
  3. Electrical scanning.
8. Report Writing, Marketing, Liability.
